TRAINING

Base Camp Coding Academy - Water Valley, MS   *2019*
Full Stack Web Development

TECHNICAL EXPERIENCE

- *Front End Final Project, Base Camp Coding Academy, October 2018*
    - This application on the home page uses Java Script, HTML, and CSS to choose a random Playbill to show.
    - I used jQuery to manipulate Bootstrap's nav-pills to show a different screen when you click the nav-pills.
    - It also uses Java script to show a thank you message and how much the client paid.

- *Mario Selection (Independent Study), Base Camp Coding Academy, January 2019*
    - Used custom HTML data attributes and CSS elements to make the Mario character selection.
    - Implemented JavaScript event listeners to show the different characters on a kart.
    - Used a onhover CSS element when a character is selected.
- *Portfolio, Base Camp Coding Academy, November 2019*
    - Used HTML, and CSS to portray my projects and different things about me.
    - Used CSS elements to portray the pictures the way I would like
    - Used Bootstrap to layout the projects in a specific way.

SKILLS

Languages: Python, HTML, CSS, JavaScript, SQL, Java, Ruby, Selenium
